COMMISSIONER FOR PATENTS  
P.O. Box 1450  
Alexandria, Virginia 22313-1450

Attention: Mr. Mark S. Graham  
Examiner

Dear Mr. Graham,

Re: Application No. 10/690,280 and your letter dated 03/31/2005.

I do not wish to change the original claims (only the material within the claims) because then the original filing date is the same. The claims are almost new, however the information is just the same, but put in a different sequence or format.

The Specification and the Detailed Description of the Preferred Embodiment are one and the same. The new description I thought did not need underlines. The unit has been added per your comments in the letter, no new material has been added.

All new material has been removed per the previous letter dated March 21, 2005. Turning or machining the shaft is under a Brief Summary of

the Invention page 2 line 7 and line 13. The fiberglass and Graphite cue shafts can be found in page 2 and 3, under the Brief Summary of the Invention and History of the Cue line 14 and line 12 respectively.

I still have the stroke symptoms and my wife is signing the letters. The letter is written with one hand.

Yours sincerely

A handwritten signature in cursive script that reads "A. Nazaruk". The signature is written in black ink and is positioned below the "Yours sincerely" text.
